

Today's world is driven by global connectivity. With the rising importance of artificial intelligence and the digital economy, cyber threats are emerging and with them the importance of Cyber Security in the post-covid times; working from home, digital crime, IT challenges. Slovenia is currently presiding the EU Council and has set a clear priority on digitalisation in its term. Our next Tea with Reason event will illustrate the importance of Cyber Security and managing cyber threats in post-covid times.

We are inviting you to our:

Tea with Reason: Lessons of cybersecurity developments in post covid times,
which will be held
